WELLESLEY COLLEGE

WELLESLEY, MASSACHUSETTS

FOUNDATION AND PURPOSE

WELLESLEY COLLEGE was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men." Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees, and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed by usage or statute to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder, the College is undenominational, but distinctively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G. Houghton and Mr. Clement S. Houghton as a memorial to their father, Mr. William S. Houghton, a trustee of the College from 1880 to his death in 1894. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday, the singing is led by a trained choir of students under the direction of the department of music.

The Wellesley College Christian Association is organized to foster religious life, and interest in social reforms and in home and foreign service.

The department of Biblical History affords the systematic study of the Bible required of all students.

ADMISSION

Students may qualify for admission to Wellesley College as candidates for the bachelor of arts degree either as members of the freshman class on the presentation of satisfactory entrance credentials, including school records and entrance examinations, or as students with advanced standing with records of accomplishment in other colleges. Since the size of the student body is limited to about fifteen hundred students, candidates in both groups are chosen very carefully in order of the excellence of their credentials including testimonials concerning health, character, and scholarship. A student is not admitted, except in very unusual cases, who is not at least sixteen years of age.

If a student is unable to meet the academic standard prescribed in college or if she does not conduct herself in accordance with the spirit and the letter of the regulations which are necessitated by the interests of a community of students and faculty organized for purposes of study, she may be required to withdraw from the College.

APPLICATION FOR ADMISSION

Forms of application will be furnished on request. An application fee of \$10 is required of all applicants and no registration is recorded until the fee is received. If paid *before* March 15, 1931, the application fee of \$10 will be credited on the first tuition bill; if paid *after* March 15, 1931, the application fee will not be credited on any bill. If the candidate cancels her registration or fails to qualify for admission, the fee is not refunded but it may be transferred to apply to a later year if the request for the transfer is received before November 1 of the year for which the candidate was registered to enter college. If a candidate's credentials are not received by July 15 and no request to transfer the application is filed by November 1, the name of the candidate will be automatically dropped from the list.

The Board of Admission cannot usually consider applications received later than May 1 of the year in which admission is sought. The date of application is used as a basis for assigning rooms to accepted candidates. It is not considered in the selection of candidates.

All communications concerning admission should be addressed to the Secretary of the Board of Admission, Wellesley College, Wellesley, Massachusetts.

HEALTH CERTIFICATES

A report from the applicant's physician showing that she is organically sound and in good health, together with a certificate of recent vaccination, must be filed with the Secretary of the Board of Admission

before June 1 of the year in which admission is sought. Blank forms for these health reports will be sent to each registered applicant in the year previous to her proposed entrance to college. Before a candidate is formally accepted she is given a thorough physical examination in the opening week of college under the direction of the college medical staff and the department of physical education. The College reserves the right to reject any candidate who, in the opinion of the college physicians, is not fitted for work in the college community.

ADMISSION TO THE FRESHMAN CLASS

Through its admission procedure, the College tries to select students with good intellectual ability, adequate preparation for further study, genuine interest in some of the lines of study offered at Wellesley College, and a purpose which will give incentive to steady work. In discovering such students, the Board of Admission studies such criteria as school records and recommendations, entrance examinations, psychological or scholastic aptitude tests, information from the candidate concerning her interests and plans for study. An attempt is made to evaluate all these records in the selection of members of the freshman class.

SCHOOL RECORDS

Complete records of a student's work in secondary school are required. Blanks for the preliminary records are sent to school principals in the spring, a year in advance of the student's completion of preparatory work. Blanks for supplementary records are sent in the spring of the year of final preparation for college. The Board of Admission examines these records carefully to discover evidence of intellectual ability, growth of power, interest in special fields of study, and steadiness of application.

The school record must be supplemented by statements from the school principals, concerning the special abilities and interests of the student, power of sustained work, good health habits, integrity, sense of responsibility, co-operativeness, initiative and self-reliance in work and in social action. The College wishes to be informed of circumstances which may have interfered with a student's work and of special honors and accomplishments during the student's secondary school course.

ADMISSION PLANS

There are four possible plans of admission to Wellesley College. A description of each plan follows.

PLAN A.—This plan calls for examinations in all subjects offered for admission credit, either the examinations of the College Entrance Ex-

amination Board, Regents examinations of New York State or, for foreign students, the matriculation examinations of a foreign university. Plan A is used by less than a third of the candidates for admission to Wellesley College.

Examinations under this plan may be taken in two or more successive years. Students are advised to take final examinations in subjects which they expect to continue in College. Either the comprehensive or the ordinary examinations of the College Entrance Examination Board may be used.

Entrance examinations in Biblical History, Harmony, Music Appreciation and Applied Music will be conducted by Wellesley College. Applications for these examinations must be made to the Secretary of the Board of Admission of Wellesley College by May 1.

For detailed information concerning the application for the examinations of the College Entrance Examination Board candidates should consult the statement on pages 31-32 under the caption "Examinations of the College Entrance Examination Board."

PLAN B.—Under Plan B four examinations of the College Entrance Examination Board are considered in connection with the school record to determine a candidate's admission. One examination subject must be chosen from each of the following groups: (1) English or History; (2) a foreign language; (3) Mathematics, Physics or Chemistry; (4) a fourth subject designated by the applicant from the list of subjects offered for admission in which the College Entrance Examination Board offers examinations. At least two examinations must cover more than two units of work.

In History and Science the examination is based on one unit only. In Mathematics candidates may take either Mathematics A (Algebra), Mathematics C (Plane Geometry), Mathematics Cp. 3 (Algebra and Plane Geometry), or Mathematics H (Trigonometry and Solid Geometry). In Latin if students have passed a preliminary examination covering three units of Latin, they may take Latin H or K (fourth year Latin). In all subjects candidates are expected to take the most advanced examination for which their preparation has fitted them.

The Board of Admission must give its permission, based upon the evidence submitted by the school, before the applicant may take the examinations. The comprehensive examinations set by the College Entrance Examination Board are judged by readers appointed by this Board, and are forwarded to the College for final decision by the Board of Admission.

Under Plan B the candidate, if admitted to college, will be admitted free from all conditions. Failure to meet completely the standard in either kind of evidence required will not necessarily involve rejection of

the applicant; the Board may accept unusual excellence in one part of the credentials submitted as offsetting unsatisfactory evidence or even failure in another part. If the candidate fails of admission she may be permitted to take examinations under Plan A or Plan B the following June.

The four examinations must be taken in one examination season in June in the examination centres provided by the College Entrance Examination Board. Full details about applying for these examinations will be found on pages 31–32 under the caption “Examinations of the College Entrance Examination Board.”

PLAN C.—Candidates under this plan may take at the end of the junior year the Scholastic Aptitude Test and two examinations (not English) from the groups now required by Plan B. On the basis of the results of these examinations, the Scholastic Aptitude Test, school records, and recommendations from the principal, provisional acceptance may be given. Final acceptance will depend upon the results of the remaining two examinations which are to be taken at the end of the senior year and upon the school records of that year.

The examinations used in this plan are those given by the College Entrance Examination Board. The results of the examinations are reported to the College instead of to the candidate as in Plan B.

A candidate who is not provisionally accepted at the end of the junior year, may apply for admission by examinations to be taken in the senior year under any College Board examination plan acceptable to the College.

Candidates wishing to enter by Plan C should make application to the Board of Admission on or before May 1 of their junior year in secondary school and permission to take examinations under Plan C must be obtained from the Board of Admission.

PLAN D.—Admission under this plan is on the basis of the school records and recommendations and the Scholastic Aptitude Test. To be considered for admission by Plan D a candidate must have ranked, during the last two years of her school course, among the highest seventh of a graduating class containing at least seven students. She must have covered the equivalent of a standard four-year high school course which satisfies in general the requirements for approval under Plan B. Unqualified recommendation of the candidate by her school principal or headmistress is essential.

Since all admission is on a competitive basis, candidates for entrance by Plan D cannot be guaranteed admission. They may become eligible for admission subject to the same conditions as candidates applying for entrance by examination. As heretofore, final selection of all candidates is made by the Board of Admission on the consideration of all evidence, both personal and academic.

Candidates from any school may be considered for admission by this plan. The College, however, will feel free to consider the geographical distribution of students in the entering class and the proportional representation from public and private schools.

Regulations governing the administration of Plan D:

1. Candidates are eligible to apply for admission without examination other than the Scholastic Aptitude Test, only in the year in which they first graduate from a secondary school.

2. Candidates must register with the College Entrance Examination Board to take the Scholastic Aptitude Test.

3. Applications should state specifically:

- (a) The number of pupils in the graduating class.

- (b) The applicant's exact numerical rank in the class.

4. Applications must be filed in the office of the Secretary of the Board of Admission on or before May first in the year in which the candidate first graduates from a secondary school.

SCHOLASTIC APTITUDE TEST

The Scholastic Aptitude Test of the College Entrance Examination Board is required of all candidates for admission and students are now advised to take the Scholastic Aptitude Test at the end of the junior year in secondary school.

EXAMINATIONS OF THE COLLEGE ENTRANCE EXAMINATION BOARD

JUNE EXAMINATIONS.—The College Entrance Examination Board will hold examinations in June 1934 at nearly 400 points in the United States and abroad.

A list of places at which examinations will be held will be published about March 1, 1934. Requests that the examinations be held at particular points should be transmitted to the Secretary of the College Entrance Examination Board not later than February 1, 1934.

Detailed definitions of the requirements in all examination subjects are given in a circular of information published annually about December 1. Upon request to the Secretary of the College Entrance Examination Board a single copy of this document will be sent to any teacher without charge. In general, there will be a charge of twenty-five cents, which may be remitted in postage.

All candidates wishing to take these examinations must make application by mail to the Secretary of the College Entrance Examination Board, 431 West 117th Street, New York City. Blank forms for this purpose will be mailed by the Secretary of the College Entrance Examination Board to any teacher or candidate upon request by mail.

The applications and fees of all candidates who wish to take the ex-

aminations in June 1934 should reach the Secretary of the College Entrance Examination Board not later than the dates specified in the following schedule:

FOR EXAMINATION CENTRES:

In the United States east of the Mississippi River or on the Mississippi	May 28, 1934
In the United States west of the Mississippi River or in Canada	May 21, 1934
Outside of the United States and Canada, except in Asia. . .	May 7, 1934
In China or elsewhere in the Orient	April 23, 1934

Every application for examination which reaches the Secretary of the Board on or before the scheduled date should be accompanied by an examination fee of \$10.00, which may be remitted by postal order, express order, or draft on New York to the order of the College Entrance Examination Board.

An application which reaches the Secretary later than the scheduled date will be accepted only upon payment of \$5.00 in addition to the regular examination fee.

When a candidate has failed to obtain the required blank form of application the regular examination fee will be accepted if the fee arrive not later than the date specified above and if it be accompanied by a memorandum with the name and address of the candidate, the exact examination centre selected, and a list of the subjects in which the candidate is to take the Board examinations.

Candidates who have failed to file applications for examination may be admitted by the supervisor to all examinations except the Scholastic Aptitude Test upon payment of a fee of \$5.00 in addition to the regular examination fee. Such candidates should present themselves at the beginning of the period of registration. They will receive from the supervisor blank forms of application which must be filled out and transmitted to the Secretary of the College Entrance Examination Board.

In order to exhibit their tickets of admission, to learn their examination numbers, and to obtain seats in the examination room, candidates should report for a morning examination at 8:45 and for an afternoon examination at 1:45. An examination will close for candidates admitted late at the same time as for other candidates. The examinations will be held in accordance with the time, Standard Time or Daylight Saving Time, observed in the local schools.

No candidate will be admitted to the Scholastic Aptitude Test late, that is, after the test has begun.

The Scholastic Aptitude Test, which will be held on the morning of Saturday, June 23, 1934, may be taken upon the completion of the

school course or at the end of the third year of secondary school work. Each candidate desiring to take this test, even though she is to take no other examination, must file with the Secretary of the College Entrance Examination Board the usual application for examination. Application blanks will be sent to any teacher or candidate upon request by mail to the Board. If the Scholastic Aptitude Test is taken in connection with other examinations no additional fee is required; if taken alone the fee is \$10.00.

A week or more in advance of the Scholastic Aptitude Test each candidate who is to take the test will receive a booklet containing, with explanations and instructions, a specimen test, the blank spaces of which are to be filled in by the candidate. In order to secure admission to the test the candidate must present not only her ticket of admission but also this booklet with the spaces filled in as requested. The supervisor will admit no candidate to the examination room without this booklet.

It is very desirable that candidates who are to take the Scholastic Aptitude Test file their applications with the Secretary. Applications for the test will be accepted by the supervisor, however, up to the day before the test provided the supervisor's supply of material for the Scholastic Aptitude Test is sufficient.

SEPTEMBER EXAMINATIONS.—The comprehensive examinations of the College Entrance Examination Board are offered in September at Wellesley College. Special permission to take these examinations must be obtained from the Board of Admission of Wellesley College, and requests should be entered by August 20. The September examinations are conducted primarily as final examinations for a limited number of promising students who have incurred only a slight failure in the June examinations under Plan A.

REGENTS EXAMINATIONS

Regents examinations with a rating of 75 per cent may be offered in place of the examinations of the College Entrance Examination Board. Credits must be presented on the card verified by the State Board of Education of New York. The Board of Admission considers an average lower than 85 per cent as doubtful evidence of ability for college work. For further information concerning the acceptance of Regents Examinations candidates are referred to the Board of Admission of Wellesley College.

PLAN OF ENTRANCE SUBJECTS

For admission to the freshman class a candidate must present fifteen units* of secondary school studies chosen according to the following plan:

Group I. Prescribed, 10 units:

English	3
Mathematics	3
Algebra 2	
Plane Geometry 1	
Latin	3
History	1

Group II. Restricted Electives, 2 units:

Foreign language	2
or	
Science	2
or	
Science 1 and a second unit of History 1	2

Group III. Free Electives, 3 units.

If the unrestricted electives are chosen from subjects other than those in the group of prescribed and restricted electives, candidates are advised to submit their plan to the Board of Admission by September 1 of the year previous to their proposed admission to college.

*A unit represents a year's study of a subject with four or five class appointments a week or not less than the equivalent of 120 sixty-minute hours of classroom work, two hours of laboratory work counting as one hour of classroom work.

DATES ON WHICH ADMISSION CREDENTIALS ARE DUE

The following credentials must be in the hands of the Board of Admission before July 15 of the year in which entrance is desired:

1. Personal information blank with the candidate's choice of examination plan.
2. Before March 1—Scholarship applications and requests for financial aid. (*Form* must be obtained in advance. For information of basis of award, see page 148.)
3. Before June 1—Health certificates and two 2" by 1½" photographs.
4. During May—Application for examinations of the College Entrance Examination Board, including Scholastic Aptitude Test (for exact dates, see pages 31–32.)
5. Before July 1—Official transcript of school record for the final year. (Blank sent to school in May.)
6. Before July 15—Official reports of Regents examinations.

DEFINITION OF REQUIREMENTS

The definitions of requirements in all subjects in which the College Entrance Examination Board offers examinations are based on the statements outlined by this Board. The complete statement of these requirements may be found in the pamphlet called "A Definition of Requirements," published annually by the College Entrance Examination Board, which may be obtained by sending twenty-five cents in stamps to the following address: College Entrance Examination Board, 431 West 117th Street, New York City.

In the following statement of requirements, the number enclosed in parentheses following the subject indicates the number of units assigned to that subject, that is, the number of years with four or five recitations a week which will normally be required in the secondary school for adequate preparation in the subject.

ENGLISH (3)

The study of English in school has two main objects: (1) command of correct and clear English, spoken and written; (2) ability to read with accuracy, intelligence, and appreciation, and the development of the habit of reading good literature with enjoyment.

GRAMMAR AND COMPOSITION.—English grammar should ordinarily be reviewed in the secondary school; and correct spelling and grammatical

accuracy should be rigorously exacted in connection with all written work during the four years. The principles of English composition governing punctuation, the use of words, sentences, and paragraphs should be thoroughly mastered; and practice in composition, oral as well as written, should extend throughout the secondary school period. Written exercises may well comprise letter-writing, narration, description, and easy exposition and argument. It is advisable that subjects for this work be taken from the student's personal experience, general knowledge, and studies other than English, as well as from her reading in literature. Finally, special instruction in language and composition should be accompanied by concerted effort of teachers in all branches to cultivate in the student the habit of using good English in her recitations and various exercises, whether oral or written.

To meet the requirement in Composition, there should be practice in writing equivalent to weekly themes the first two years, and fortnightly themes the last two years of the preparatory course. Themes should be accompanied by simple outlines. The following books are suggested: Scott and Denney's *Composition—Rhetoric*; Neal's *Thought Building in Composition*; Robins and Perkins' *Introduction to the Study of Rhetoric* supplemented by Herrick and Damon's *Composition and Rhetoric*; Shackford and Judson's *Composition—Rhetoric—Literature*; Manly and Rickert's *The Writing of English*.

LITERATURE.—The second object is sought by means of the reading and study of a number of books, from which may be framed a progressive course in literature covering four years. The student should be trained in reading aloud and be encouraged to commit to memory notable passages both in verse and in prose. As an aid to literary appreciation, she is further advised to acquaint herself with the most important facts in the lives of the authors whose works she reads and with their place in literary history. A few of these books should be read with special care, stress being laid upon form and style, the exact meaning of words and phrases, and the understanding of allusions.

A list of the books recommended for reading and study, and suggestions concerning preparation for the College Board examinations in English will be found in a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

HISTORY (1, 2 OR 3)

All applicants for admission are required to offer one unit in History. One or two additional units of History may be offered from the following: (1) American History (with or without Civil Government), (2) Ancient History, (3) English History, (4) European History. For

suggestions about preparation in History and the scope of the College Board examinations candidates are referred to a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

MATHEMATICS (3 OR 4)

In a document entitled "Definition of Requirements," published by the College Entrance Examination Board, will be found the description of the requirements.

ALGEBRA.—The requirement is met by the course in Mathematics designated as A.

PLANE GEOMETRY.—The requirement is met by the course in Mathematics designated as C. If desired, the course designated as *cd* may be substituted.

SOLID GEOMETRY AND TRIGONOMETRY.—The requirement is met by the courses in Mathematics designated as D and E.

LATIN (3 OR 4)

4 UNIT REQUIREMENT.—Candidates should be familiar with the forms and syntax of the language and possess a vocabulary sufficient to translate Latin into idiomatic English and English into correct Latin. They should also be able to translate at sight Latin prose and poetry of moderate difficulty and to read Latin prose and verse according to the Roman method of pronunciation with strict attention to vowel quantities. To attain such proficiency not less than five forty-minute periods a week for four years should be given to the study of Latin.

The following recommendations are made in respect to the reading:

(1) In the second year the early reading should be easy Latin which may be "made" or adapted Latin; not less than one half of this year should be devoted to the reading of selections from Cæsar. The reading for the year may also include easy selections from such authors as Aulus Gellius, Eutropius, Nepos, Phædrus, Quintus Curtius Rufus, and Valerius Maximus, or books of selections containing some of these together with authors of prose works.

(2) In the third year, if the reading be in prose, not less than one half should be devoted to the reading of selections from Cicero; the reading for the year may also include selections from such authors as Pliny, Sallust, and Livy, or books of selections containing these and other authors of prose works.

(3) In the fourth year, if the reading be in poetry, not less than one half should be devoted to the reading of selections from Vergil; and the reading for the year may also include selections from such works as the *Metamorphoses*, *Tristia*, *Heroides*, and *Fasti* of Ovid, or books of selections containing poems or extracts from Ovid or from other poets.

The examination paper will include passages of Latin prose and verse of varying degrees of difficulty for "comprehension" and translation, and passages for Latin composition for the candidates presenting three years of Latin, and for those presenting four years of Latin in one examination. Accompanying the different passages set upon the paper will be questions on forms, syntax, and the idioms of the language, as well as such questions on the subject-matter, literary and historical, as may fairly be asked.

Further information concerning the character of the examination in four units of Latin will be found in a document entitled "Definition of Requirements," published by the College Entrance Examination Board.

3 UNIT REQUIREMENT.—The course of study for the first two years is the same as for candidates offering four units of Latin for admission. In the third year either the prose authors or the poetry may be offered. Constant practice in Latin writing is essential. Suggestions for study will be found in the document referred to above.

Suggestions Concerning Preparation.—Exercises in translation at sight should begin in school with the first lessons in which Latin sentences of any length occur, and should continue throughout the course with sufficient frequency to insure correct methods of work on the part of the student. From the outset particular attention should be given to developing the ability to take in the meaning of each word—and so, gradually, of the whole sentence—just as it stands; the sentence should be read and understood in the order of the original, with full appreciation of the force of each word as it comes, so far as this can be known or inferred from that which has preceded, and from the form and the position of the word itself. The habit of reading in this way should be encouraged and cultivated as the best preparation for all the translating that the student has to do. No translation, however, should be a mechanical metaphrase, nor should it be a mere loose paraphrase. The full meaning of the passage to be translated, gathered in the way described above, should finally be expressed in clear and natural English.

It is of special importance that practice in writing easy Latin *at sight* should be continued *throughout the entire period of preparation*

in connection with the reading of the Latin authors. In the last year special attention should be given to translating continuous English into Latin both in the prepared and sight work.

A written examination cannot test the ear or tongue, but proper instruction in any language will necessarily include the training of both. The school work in Latin, therefore, should include much reading aloud, writing from dictation, and translation from the teacher's reading. Learning suitable passages by heart is also very useful, and should be more practiced. The work in composition should give the student a better understanding of the Latin she is reading at the time, and greater facility in reading. The teachers of Latin in the preparatory schools are urged to insist upon the use of good English in translation.

FRENCH (2, 3 OR 4)

The department has adopted the new requirements of the College Entrance Examination Board that appear in the current number of the "Definition of Requirements." To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation.

French being the language used in the classroom in college, students are expected to understand it when spoken by the instructor in the classroom, and to be able to answer in French when asked questions on their work and reading.

GERMAN (2, 3 OR 4)

The department has adopted the new requirements of the College Entrance Examination Board that appear in the current number of the "Definition of Requirements."

The language of the classroom in all courses is almost exclusively German.

GREEK (2 OR 3)

2 UNIT REQUIREMENT.—During the two years the student should acquire a knowledge of the language sufficient to enable her (1) to translate at sight simple passages of Attic prose, and to answer questions on ordinary forms and constructions; (2) to translate into Greek a passage of connected English narrative, based on Xenophon; (3) to read Greek aloud with correct pronunciation and with full expression of the sense of the passage.

The prescribed study includes—(1) Grammar: inflections; the simpler rules for composition and derivation of words; use of cases; construction of sentences, with particular regard to the use and meanings

of the moods. (2) Prose Composition: regular practice in writing or speaking Greek, with at least twenty written exercises, including some connected passages. (3) Three books of Xenophon's *Anabasis*, or its equivalent.

Suggestions Concerning Preparation.—The acquiring of a good working vocabulary should begin with the first lesson, and constant practice in the use of the more common words should be kept up throughout the course. The students should learn to recognize the words by hearing as well as by sight, and should be able to use them in speech as well as in writing. Writing Greek from dictation, learning short passages by heart, and putting simple English sentences into Greek orally, or answering in Greek simple questions asked in Greek serve not only to fix vocabulary and forms in the students' minds, but also to give them a feeling for the natural Greek form of expression.

3 UNIT REQUIREMENT.—In addition to the preparation for the two unit requirement stated above, the student must be able to translate at sight a passage from Homer, to read it with a correct expression of the rhythm, and to answer a few questions on the Homeric forms and on the subject-matter.

The prescribed study includes: three books of Homer's *Iliad*; Prose Composition, continued practice in translation into Attic prose of connected passages of English.

ITALIAN (2, 3 OR 4)

The department has adopted the new requirements of the College Entrance Examination Board that appear in the current number of the "Definition of Requirements."

It is essential that the student should become accustomed from the beginning to the use of the spoken language in the classroom.

SPANISH (2, 3 OR 4)

The Department of Spanish adopts the new requirements as they are printed in the current number of the document entitled "Definition of Requirements."

It is essential that the student should become accustomed from the beginning to the use of the spoken language in the classroom.

SCIENCE (1, 2 OR 3)

One to three units of science may be offered from the following subjects: (1) Biology, (2) Botany, (3) Chemistry, (4) Geography, (5) Physics, (6) Zoölogy. The requirements in science are met by the courses outlined in a document entitled "Definition of Requirements,"

published by the College Entrance Examination Board. The requirement in Botany may also be met by covering the main features in the course outlined in the Laboratory Guide for the introductory course at Wellesley College. Copies of this guide may be secured if desired from the office of the Board of Admission, Wellesley College.

Students are not required to submit laboratory notebooks for admission credit in science.

MUSIC (1 OR 2)

One unit of admission credit is granted in either Harmony or Appreciation.

Two units of admission credit are granted for either of the following combinations: I. Harmony and Practical Music; II. Appreciation and Practical Music.

No admission credit is given for Practical Music alone.

A. HARMONY.—Students taking this examination must present, at the time of the examination, their harmony notebooks indorsed by their teachers. The examination will be adapted to the proficiency of those who have had one year's systematic training with at least five lessons a week or its equivalent. (It is understood that this work may be done in two or more years.) The candidate should have acquired:

(1) The ability to harmonize in four vocal parts simple melodies or basses of not fewer than eight measures in major and minor. These melodies and basses will require a knowledge of (a) triads and inversions, (b) diatonic seventh chords and inversions, (c) non-harmonic tones, (d) modulation, transient and complete, to nearly-related keys.

It is expected that systematic work in ear-training, involving the recognition of intervals (melodic and harmonic), melodies, and chords, has been done in connection with the above, and students will be examined in the same.

The ground covered by this examination is represented by the following textbooks. Goetschius: *The Theory and Practice of Tone Relations*, Chaps. I through XXI. Foote and Spalding: *Modern Harmony*, Chaps. I through XXI. Gehrkens: *Music Notation and Terminology* is suggested for rudiments, and Wedge: *Ear-Training and Sight-Singing* for practice in the recognition of intervals and for melodic dictation. Material for practice in the recognition of chords may be found in any harmony textbook.

B. APPRECIATION.—It should be the purpose of this course (a) to provide suitable training to accompany the study of practical music

during the preparatory years, (b) to prepare students for entering a course in elementary harmony, (c) to acquaint students with a small but representative literature of music and with some of the elements of musical form.

The course should cover the following:

(NOTE: It is suggested that the material outlined below under I and II be made *prerequisites* to the course, not included in it.)

I. Elements: names of the scale tones; scale formation, major and minor; key signatures; commonly used time signatures; commonly used marks of expression; chord formations including the dominant seventh.

II. Ear-training: recognition of major and minor scales and triads; recognition of all intervals in major and minor scales; recognition of plagal cadence, perfect cadence, half cadence, deceptive cadence; recognition of duple and triple meters and of rhythms characteristic of Waltz, Minuet, Mazurka, and Polonaise.

III. A study of the following forms: Simple Three-part Song-form, Binary Form, Ternary Form, Rondo Form, Theme and Variation Form, Minuet and Trio Form.

In testing this knowledge, the student will be required to recognize the form of a composition upon hearing it played three times.

IV. Memory work. The examination will include a memory test of representative musical examples. A list of at least twenty examples chosen by the student (from the works suggested for use in appreciation courses by the music departments of three Eastern Women's Colleges*) must be presented to the examiner. The examination on this part of the work will be based on the list thus presented.

C. PRACTICAL MUSIC

PIANO. The candidate must be prepared to play for the examiners the following and no candidate will be examined who is not *ready to perform* these requirements: (1) Any scale (including major and all forms of minor) at metronome speed of four notes=88. (2) Any two studies selected by the student from Czerny, Opus 261, Heller, Opus 45, or Le Couppé, Opus 20. (3) A Bach Two-Part Invention. (4) The first movement of a sonata by Haydn, Mozart, or Beethoven. (5) A piece of moderate length (which must be memorized) selected from the works of Schubert, Schumann, Mendelssohn, or Chopin. (6) Hymn tunes and simple pieces at sight.

*A list of these compositions will be furnished on application to the Department of Music of Wellesley College.

VOICE. The candidate must be prepared to meet the following requirements: (1) To sing with good pitch and intonation, technical facility, correct phrasing, and musical interpretation not fewer than six of the following songs: Any song of MacDowell, Franz Schubert, Schumann, or Brahms; Mozart's *Wiegenlied*, Grieg's *Mit einer Primula Veris* or *Der Schwan*; any of the Weckerlin *bergerettes*; any song from Schirmer's *Anthology of Italian Song*; or other songs with the approval of the Department. (2) To play simple accompaniments. (3) To sing at sight music of the type of folk songs, Brahms' *Wiegenlied*, Schubert's *Haiden Röslein*, and others.

VIOLIN. The candidate must be prepared to play: (1) Major and minor scales with good intonation. (2) Any two studies of the grade of Dont, Opus 38 or Mazas, Opus 36, Vol. I. (3) A sonata of Mozart, a sonatina of Schubert, or solo of moderate difficulty with correct phrasing and musical tone. (4) Simple pieces at sight.

BIBLICAL HISTORY (1)

A course such as the one outlined by a committee of the National Association of Biblical Instructors will meet the requirement. A statement of this course has been published in "Christian Education," March, 1928, pp. 385-392, and a reprint of this can be obtained from the Council of Church Boards of Education, 111 Fifth Ave., New York City.

ADMISSION TO ADVANCED STANDING

TERMS OF ADMISSION

The number of students admitted to advanced standing in any year is limited and all entrance is on a competitive basis. If a student has maintained an excellent record in college and has special interests which she can follow out at Wellesley College, the Board of Admission would encourage her to apply for entrance with advanced standing credit. For information about registration candidates should read page 27.

A candidate should show that she has covered the admission requirements for the freshman class of fifteen units of secondary school work (see page 34) and has completed at least a full year of highly satisfactory work at another college. She should be entitled to honorable dismissal from the college which she has attended and should be recommended by her instructors. The Board of Admission will give information about the colleges and universities from which credits are accepted.

Candidates admitted from other colleges will be required to register during the first year as unclassified students, unless they have met the

examination requirements for entrance to the freshman class at Wellesley College. (See pages 28-31.) Residence of at least two years is required to obtain the B.A. degree, of which one must be the senior year. The work of these two years must include all the prescribed work (see page 48), not covered by the credentials submitted. The exact amount of credit given for work completed in another college will not be determined until after the first year of residence. The success with which advanced standing candidates carry the work in the first year at Wellesley is a determining consideration in deciding credit.

The selection of applicants for admission with advanced standing will be made in July of the year in which entrance is desired.

CREDENTIALS

The following credentials must be in the hands of the Board of Admission before July 1 of the year in which entrance is desired:

1. Official statement of college credits, with dates of attendance, courses offered for credit, grades attained in each course, entrance credits, and honorable dismissal.
2. Official record of any entrance examinations which have been taken.
3. Copy of the catalogue of the college attended, with name of candidate, list of courses offered for credit, and page references.
4. Letter of recommendation from one of candidate's instructors and the Dean.
5. Health credentials.
6. Statement from candidate of her reasons for wishing to transfer to Wellesley College and of the subjects of her major interest.

ADMISSION OF CANDIDATES FOR THE M.A. AND M.S. DEGREES

Candidates for the degree of Master of Arts or Master of Science in Hygiene and Physical Education must be graduates of Wellesley College or of other institutions of satisfactory standing, and must present adequate credentials signifying their ability to carry on the work for the degree.

Application for admission as a graduate student in any department should be made upon a form which will be furnished by the Dean of Graduate Students on request. It is desirable that the application be sent by March first of the year in which the student proposes to enter. It should be accompanied (1) by the official record of admission subjects, college courses and grades, (2) by a copy of the catalogue of the institution attended, marked to indicate the courses taken, (3) if possible, by papers and reports of work.

A matriculation fee of five dollars is payable when a student is accepted as a candidate for the Master's degree. The amount of this fee will be deducted from the diploma fee of twenty-five dollars payable when the degree is received.

Graduate fellowships and scholarships are described on pages 145-148.

A circular containing full information for graduate students will be sent on application to the Dean of Graduate Students. For requirements for the M.A. and M.S. degrees see page 52.

ADMISSION OF STUDENTS NOT CANDIDATES FOR A DEGREE

CANDIDATES FOR THE CERTIFICATE IN HYGIENE AND PHYSICAL EDUCATION

A two years' course, especially designed for the training of teachers of hygiene and physical education, and leading to the certificate of the Department of Hygiene and Physical Education, is offered to graduates of approved colleges who meet the requirements. Full information will be found on pages 107-112.

Correspondence should be addressed to the Dean of Graduate Students.

CANDIDATES FOR SPECIAL WORK IN OTHER DEPARTMENTS

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Admission, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities for prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and attainment are not ordinarily admitted. If such desire admission they must expect to meet by examination the requirements prescribed for admission to the freshman class, or a full equivalent for them, and to satisfy such additional requirements as are prescribed by the departments which they propose to enter. Specific statements of these requirements in Music will be found on page 124.

As the capacity of halls of residence is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college houses.

Correspondence should be addressed to the Secretary of the Board of Admission.

DEGREES

The following degrees are conferred by the Trustees upon recommendation of the Academic Council:

Bachelor of Arts.

Master of Arts.

Every candidate for the B.A. degree must complete before graduation the equivalent of sixty hours. First year French and first year German may not *both* be counted among the sixty hours. Neither first-year French nor first-year German may be so counted if taken after the sophomore year. Second-year French, second-year German, first-year Italian and first-year Spanish may not be counted among the sixty hours, if taken after the junior year. Of the sixty hours required for the B.A. degree, a certain number is prescribed, the rest elective.

II. ELECTIVE. All courses are classified in Grades I, II, III; Grade I including elementary courses and Grade III the most advanced courses. All of the sixty hours not indicated in the above are elective, subject to the approval of the Faculty with the following restrictions:

Every candidate for the B.A. degree must show before graduation that she has completed twenty-one hours of restricted elective work, as follows:

* If a student fails to pass with a grade of at least C in the second semester of English Composition 101, she will be required to take an additional semester course in the sophomore year.

† The hour in practical Hygiene and Physical Education is met by four periods in practical work, two periods per week in the freshman year and two in the sophomore year.

- (1) Twelve hours in one department
Nine hours in a second department,

or

- (2) Nine hours in one department
Nine hours in a second department
Three hours in a third department.

The three-hour elective is to be supplementary to the work of one of the departments in which nine hours are chosen;

or

- (3) Twelve hours in one department
Six hours in a second department
Three hours in a third department.

The six-hour and three-hour electives are to be supplementary to the work of the department in which twelve hours are chosen;

or

- (4) Twelve hours in one department.

Three courses (conceivably in different departments) supplementary to the twelve hours;

or

- (5) Fifteen hours in one department
Six in a second department.

The six-hour elective is to be supplementary to the work of the department in which fifteen hours are chosen.

Of the courses offered to fulfill this requirement, at least one full course of Grade III must be taken in the senior year. Of the twenty-one hours required at least nine hours must be above Grade I and at least six hours must be of Grade III.

Every candidate for the B.A. degree must pass a general examination in a major of nine or more hours in addition to the regular course examinations.

REQUIREMENTS FOR THE B.A. DEGREE

IN 1936 AND THEREAFTER

In constructing the curriculum of which the requirements are given below, the faculty was guided by a belief that a student's four years in college should give her several specific sorts of training. The *prescribed work* is planned to assure her possession of certain skills which are of general use and to add to the information which she has acquired before coming to college further information considered of fundamental importance. Thus the prescribed work in English Composition, Speech and foreign language is designed to assure her having accuracy and effectiveness in speaking and writing English, and in reading at least one foreign language. The prescription in Hygiene affords the student a knowledge of the laws of health. The prescribed work in Biblical History gives a knowledge of the historical basis of Christianity.

The requirement of *work for distribution* is made with the purpose of securing for each student some acquaintance with methods of work and ways of thinking in various representative fields of knowledge. The requirement of *work for concentration* is made in order that the student shall make a reasonably thorough study of one field of knowledge. The curriculum is so planned that a student has an opportunity for a considerable amount of absolutely free elective work.

Every candidate for the B.A. degree in 1936 and thereafter must complete before graduation the equivalent of sixty hours, and have in addition a reading knowledge of either French or German.

The examination to test the student's reading knowledge of French or German may be taken at the beginning of the freshman, sophomore or junior year. A reading knowledge of either Italian or Spanish may be accepted by the Academic Council as a substitute for a reading knowledge of French or German in cases in which students can show that such a knowledge of Italian or Spanish is needed by them as a tool for work in some particular field. Students majoring in a modern foreign language will be tested in a reading knowledge of a second language; such students may postpone the examination until the beginning of the senior year.

Of the sixty hours required for the B.A. degree a certain number is prescribed, a certain number must be elected to fulfill the requirements of *work for distribution* and *work for concentration*, the rest is free elective.

I. PRESCRIBED. The following subjects are required as specified:

Biblical History	3	hours
English Composition (unless exempted by examination)	3*	"
Hygiene and Physical Education 120 (unless exempted by examination)	1	hour
Hygiene and Physical Education (practical)	1†	"
Speech (unless exempted by examination)	1	"

Of the required subjects, English Composition, three hours, must be taken in the freshman year; Hygiene and Physical Education one and one-half hours in the freshman year, and one-half hour in the sophomore year; Biblical History, three hours, in the sophomore year; Speech, one hour, before the junior year.

II. WORK FOR DISTRIBUTION. Six hours in addition to the prescribed work, to be elected in each of the three groups given below. The six hours in each of the three groups are to be elected so as to fall three hours in one department and three hours in another. Only one beginning course in a modern language may be counted for distribution.

Group I. Art, English Composition, English Literature, French, German, Greek, Italian, Latin, Music, Spanish, Speech.

Group II. Biblical History, Economics and Sociology, Education, History and Political Science, Philosophy and Psychology.

* If a student fails to pass with a grade of at least C in the second semester of English Composition 101, she will be required to take an additional semester course in the sophomore year.

† The second hour in Hygiene and Physical Education is met by four periods in practical work, two periods per week in the freshman year and two in the sophomore year.

Group III. Astronomy, Botany, Chemistry, Geology and Geography, Mathematics, Physics, Zoölogy and Physiology.

Every freshman must take for distribution three hours in each of two groups; and every student is required to have had by the end of her sophomore year at least three hours counting for distribution in each group.

III. WORK FOR CONCENTRATION. Twenty-one hours in one field of concentration, of which a major of twelve to fifteen hours shall be in one department, and nine to six hours shall be in courses related or supplementary to the major but falling in one or more departments other than that in which the major is taken.

All courses are classified in grades I, II, III; grade I including elementary courses and grade III the most advanced courses. Of the courses offered to fulfill the requirement of *work for concentration* at least one full course of grade III must be taken in the senior year. Of the twenty-one hours required at least nine hours must be above grade I and at least six hours must be of grade III.

Every candidate for the B.A. degree must pass a general examination in a major subject in addition to the regular course examinations.

COURSE EXAMINATIONS

An examination period occurs at the end of each semester. At these periods, and also during the days of the admission examinations in September, examinations for the removal of conditions and deficiencies and for advanced standing may be taken.

A student who wishes to take an examination upon a course which is not a part of her approved schedule for the year, must apply to the College Recorder for the requisite card of admission to the examination. The last day for receiving applications for such cards is *for the September examinations, September first; for the mid-year examinations, January first; for the June examinations, May first.*

N. B. Examinations for the removal of conditions and deficiencies excepted, no student can be admitted to examination upon a course which is not a part of her approved schedule for the year without permission both from the Chairman of the Department concerned and the Dean. *No student, therefore, should enter upon preparation for such an examination until her plan has been approved by both of the above named officers.*

STANDARD FOR GRADUATION

A certain quality grade is required for graduation and for the purpose of determining this quality grade, numerical values called "points" are given to the grade letters as follows: for grade A, three points for each semester hour of the course in which the grade is received; for grade B, two points; for grade C, one point; for grade D (passing), no points; for a grade below D, no points and not counted in hours toward a degree.

In order to be recommended for the degree of Bachelor of Arts a student must in each semester attain as many quality points as the hours she carries, i.e., a C average. Deficiency of points in any semester may be made good only in accordance with regulations adopted by the Faculty. Students who are deficient in quality points at the end of the third year or otherwise not diploma grade will not be permitted to continue.

The College reserves the right to require the withdrawal of students whose scholarship is not satisfactory, and of those who for any other reason are regarded as not in accord with the ideals and standards which the College seeks to maintain.

HONORS IN SUBJECTS

Students who wish to become candidates for Honors may apply in the spring of their sophomore or junior year to the special committee appointed to consider these applications.

All applications from candidates for Honors in Subjects must be accompanied by recommendations from the instructors concerned.

A student electing to study for Honors in Subjects will choose a Field of Distinction and will work in that field under the special direction of one or more of the instructors concerned who will advise her on the possible development of her Field of Distinction and will guide her in the carrying on of independent work within it.

A candidate for Honors in Subjects must take all the prescribed work. In place of the regular restricted elective she must take at least twenty-one hours in the chosen Field of Distinction. This Field of Distinction includes work in the major department and allied courses, and with the approval of the major department directing the work may include three hours of directed study independent of scheduled courses in the junior year and three hours in the senior year, thus giving the able student a stimulus to form habits of investigation in a manner to lead to advanced study.

Admission to Honors in Subjects will be confined to candidates whose scholarship, maturity and previous range of acquirement justify exceptional concentration. The work in the Field of Distinction for such a candidate will be subject to the following tests:

1. In general, the regular tests of the courses in the Field of Distinction must be taken, including the examinations in these courses through the junior year.

2. A comprehensive examination must be taken in the student's Field of Distinction at the close of the senior year. This examination will take the place of the general examination required for seniors and will be in part or wholly oral.

PRE-MEDICAL COURSE

Each student who is planning to study Medicine is advised to confer with her Class Dean before the beginning of her sophomore year.

Entering students are advised to elect two pre-medical sciences in the freshman year.

In general, requirements for admission to medical schools of Class A can be met by nine hours in Chemistry and six hours in Physics and Zoölogy respectively, but each student is advised to study carefully the requirements for the particular school which she has chosen.

Attention is called to the fact that twelve hours are required as a basis for the general examination in any department. It is, however, possible to fulfill the minimum requirement for medical schools, and to take the general examination in an entirely different field.

PREPARATION FOR HOSPITAL AND PUBLIC HEALTH WORK

Students planning to prepare for work in hospital or Public Health laboratories should begin both Chemistry and Zoölogy in their freshman year in order to have the necessary foundation for advanced courses. The departments of Botany, Chemistry and Zoölogy should be consulted concerning combinations of courses in later years of the college course.

GENERAL INSTRUCTIONS

The programme in the freshman year is as follows:

English Composition 101	3	hours

Hygiene 121 (practical work 2 hours)	$\frac{1}{2}$	hour
Electives, 4 three-hour courses	12	hours
Total	16	$\frac{1}{2}$ hours

The courses must be chosen in accordance with the prerequisites given in the department statements from the list of courses named below, with the provision that one course must be chosen from each of two of the three groups (see below, and also page 48), and with the advice that the choice should not include two beginning courses in modern language.

If 16½ hours are satisfactorily completed in the freshman year, the normal programme for the remaining years would be as follows:

Sophomore year	16½ hours
Junior year	15 “
Senior year	12 “

If 16½ hours are not completed in both the freshman and sophomore years, a student may carry more hours in the junior and senior years than specified above, subject to the usual regulations.

Elective courses must be chosen with great care so that changes will not be necessary. Students are held responsible for observing the requirements for the degree and the proper sequence of courses.

Students, except entering freshmen, are required to choose in May their free and restricted electives for the year following. All requests for changes of elective courses should be sent in time to reach the College before September 15th.

REQUIREMENTS FOR THE M.A. AND M.S. DEGREES

Wellesley College offers graduate work leading to the degrees of Master of Arts, and Master of Science in Hygiene and Physical Education. The work required of a candidate is considered to be the equivalent of twelve hours of college work. In general a candidate is required to work in one department. The programme includes no fewer than two full courses of Grade III or their equivalents, and may include a thesis embodying the results of original research, or a report or reports based on independent work. A candidate for either degree is required to have a working knowledge of either French or German, to be tested by examination *at entrance*. Individual departments may require a second language. At least one year of graduate study is required of all candidates, but more time may be needed for the completion of the work. One year *in residence* is required of all candidates except graduates of Wellesley College who have done the work at some institution which does not grant a Master's degree to women.

Information regarding requirements for admission, theses, final examinations, etc., will be found in the Graduate Circular which will be sent on application to the Dean of Graduate Students.

1. UNDERGRADUATE COURSES

The Department of Hygiene and Physical Education aims to build up in each student sufficient strength and vitality to meet the demands of a normally active life; to encourage an appreciation and maintenance of fundamental health habits; to develop poise, a habit of normal unstrained carriage, a sense of rhythm, coordination and motor judgment—to enable her to handle herself confidently in any situation; to develop skill and permanent interest in wholesome recreational activities adapted to individual needs and capacities; to awaken in her a sense of self as a vital, responsible part of a group and the necessity for both harmony and individuality in effective group

work; in short, the Department aims to help each girl to adapt herself efficiently and happily to the demands made upon her by modern life.

Two hours in Hygiene and Physical Education are prescribed for the degree. II. PRACTICAL MUSIC (INSTRUMENTAL AND VOCAL LESSONS)

Instructors in Practical Music: BLANCHE FRANCES BROCKLEBANK (Piano)
 JEAN EVELYN WILDER, B.A. (Piano)
 JACQUES HOFFMANN (Violin)
 GLADYS AVERY (Voice)
 VIVIAN HUSE PLACE (Harp)
 YVES CHARDON (Violoncello)
 CLARENCE EVERETT WATTERS, F.A.G.O. (Organ)
 MALCOLM HAUGHTON HOLMES, B.S. (Conductor of Orchestra)

Attention is called to the fact that a student need not necessarily spend five years in college in order to carry on practical music at the same time with the academic course. See (a) following.

Freshmen may not elect instrumental or vocal music without course 101 or by special permission course 201. There is an extra charge for instrumental or vocal music. (See page 143.)

Attention is called to the fact that students who elect Musical Theory 103 are thereby obtaining one hour's credit toward the B.A. degree in connection with work done in practical music. Practical music is offered to all students, whether candidates for degrees or not, as stated below:—

(a) *Candidates for the B.A. degree who propose to spend but four years in college may take practical music*, provided that they obtain each year the permission of the Dean as well as of the Chairman of the Department. They must also take a full course in Musical Theory, unless they have completed two three-hour courses in the subject.

(b) *Candidates for the B.A. degree who are willing to devote five years to the college course* will be permitted to take practical music each year of the course, governed by the restriction laid down in (a).

(c) *Candidates for the B.A. degree who wish also the Certificate of the Department of Music* should plan to devote *five years to the college course*. Such students are required to take practical music, two lessons a week throughout the five years. They must complete, satisfactorily to the department, a course in the literature of the instrument chosen or of the voice; they must apply for the certificate at least three years in advance. The study of Musical Theory is required throughout the course.

(d) Students not candidates for the B.A. degree *who desire to specialize in music* must meet the requirements prescribed for admission to the freshman class, and must in addition pass an entrance examination in Harmony. Special students must take both Musical Theory and vocal or instrumental lessons, two a week, with not less than twelve hours of weekly practice. They must also take from six to nine hours per week of academic work, including Musical Theory, as may be decided in consultation with the Dean.

(e) Students not candidates for the B.A. degree who wish the *Certificate of the Department of Music* must comply with the conditions laid down in (d); moreover, the academic work taken must include modern languages. Such students must apply for the certificate on entering the department, and must have already acquired the fundamental technique of the instrument chosen or of the voice. The time occupied in study for the certificate depends upon the talent, upon the proficiency of the student at entrance, and upon her subsequent diligence; but in general four years at least are necessary. The various courses are so arranged that the pupil on completion will have an acquaintance with the best musical literature.

(f) Graduates of Wellesley College or of similar institutions may make special arrangement for instrumental or vocal lessons.

(g) Permission to practice in Music Hall cannot in general be given to students not regularly registered in the department.

(h) Students whose progress is not satisfactory may be required to discontinue their lessons.

FELLOWSHIPS AND SCHOLARSHIPS

A. FOR GRADUATES

THE ALICE FREEMAN PALMER FELLOWSHIP, yielding an income of not less than \$1,400, was founded in 1903, by Mrs. David P. Kimball. The holder of this fellowship must be a graduate of Wellesley College or of some other American college of approved standing, a young woman of good health, not more than twenty-six years of age at the time of her appointment, unmarried throughout the whole of her tenure, and as free as possible from other responsibilities. The same person will not be eligible to the fellowship for more than two years.

The fellowship may be used for study abroad, for study at any American college or university, or privately for independent research. Several times during the period of tenure the holder of the fellowship must furnish evidence that it is used for purposes of serious study and not for general culture; and within three years from entrance on the fellowship she must present to the faculty a thesis embodying the results of the research carried on during the period of tenure.

Applications for this fellowship should be received by the President of Wellesley College not later than February first of the academic year preceding that for which the fellowship is asked. A form to be used in making application may be obtained from the Office of the President, Wellesley College. This application must be accompanied by theses or papers presenting evidence of the most advanced work of the candidate, since the fellowship is not assigned on the basis of unsupported credentials, however commendatory.

FANNY BULLOCK WORKMAN SCHOLARSHIP, yielding an income of not less than \$1,200, was founded in 1929 by the bequest of Mrs. Fanny Bullock Workman.

The holder of this scholarship shall be a woman holding a degree from Wellesley College. She shall present evidence of (a) good health, (b) character, (c) financial need, and (d) ability; and shall be free from personal obligation which would interfere with study. The scholarship may be used to assist preparation for "any useful work." Twice during the period of tenure the holder of the scholarship shall furnish evidence of work done; and not later than one year after the completion of the period, a full report or other suitable evidence of the use to which the scholarship has been applied shall be presented.

The application for this scholarship should be received by the President of Wellesley College not later than February first of the academic year preceding that for which the scholarship is asked. A form to be used in making application may be obtained from the Office of the President, Wellesley College. The application must be accompanied by evidence of the most advanced work of the candidate in her chosen field.

THE HORTON-HALLOWELL FELLOWSHIP has been established by the Alumnae Association of Wellesley College in honor of Mary E. Horton, the first professor of Greek, and Susan M. Hallowell, the first professor of Botany. It is open to

alumnae of Wellesley College for graduate study in candidacy for the degree of Doctor of Philosophy or for private research of equivalent standard. The amount of the fellowship for 1933-34 is \$1,250.

Application should be made by letter from the candidate to the Fellowship Committee of the Alumnae Association making the award. The applicant should describe fully the plan of study which she proposes to follow if granted the fellowship, and her preparation for this work. The letter should be accompanied by such specimens of the written work of the candidate as may best demonstrate her ability to carry on independent study in her chosen field. Before making formal application the candidate should obtain more detailed information from the committee.

Applications should be received before February fifteenth of the year preceding that for which the fellowship is desired. All communications regarding the fellowship should be addressed to the Chairman of the Fellowship Committee, Alumnae Office, Wellesley College.

RESEARCH FELLOWSHIP FOR THE STUDY OF ORTHOPÆDICS IN RELATION TO HYGIENE AND PHYSICAL EDUCATION, yielding \$1,000.

The general requirements to be met by applicants are as follows:—good health; the bachelor's degree from a college or university of good standing; sound preparation in chemistry, physics, and biology; special preparation in anatomy, kinesiology, and physiology; familiarity with the elements of orthopædic theory and practice; and an insight into some one or more of the problems of orthopædics as related to hygiene and physical education.

The work on the problem chosen in consultation with the department must be done in residence at Wellesley College. It will, in general, begin in the September following the acceptance of the applicant, and will continue through one calendar year. It will involve kinesiology, applied physiology, and the study of clinical material. For the latter, opportunity will be provided to study the work of orthopædic surgeons in Boston and other eastern cities. The results of the investigation are to be embodied in a thesis to be submitted to the department and published.

Applications for this fellowship should be received by the Chairman of Department of Hygiene and Physical Education, Wellesley College, not later than March first of the academic year preceding that for which the fellowship is asked. The decision reached by the department will be based upon the applicant's record, upon personal correspondence, and, when possible, upon personal interviews.

THE LORETTA FISH CARNEY MEMORIAL SCHOLARSHIP of \$1,200 was founded in 1920 by the alumnae and staff of the Boston Normal School of Gymnastics and the Department of Hygiene and Physical Education of Wellesley College; the income of this fund to be awarded, at the discretion of the teaching staff of the department and of the President of the College, to a senior in the department.

THE AMY MORRIS HOMANS SCHOLARSHIP FUND of \$6,700 was founded in 1924 by the Mary Hemenway Alumnae Association of the Graduate Department of Hygiene and Physical Education in honor of Miss Amy Morris Homans, pioneer and leader in physical education in the United States; the income of this fund to

be awarded to a student in the Graduate Department of Hygiene and Physical Education who is in need of assistance and shows proficiency and promise.

THE TRUSTEE GRADUATE SCHOLARSHIPS. Two scholarships yielding an income of \$750 each have been established by the Trustees of Wellesley College for members of the senior class who are qualified for graduate work. The scholarships may be used for study in this country or abroad. Notice of the conditions of application are sent by the Dean of Graduate Students in the spring of each year to qualified seniors.

EIGHTEEN GRADUATE SCHOLARSHIPS of the annual value of tuition for one year have been established for the benefit of approved candidates for the Master's degree in residence at Wellesley College. Application for one of these scholarships should be made before March first by personal letter from the candidate to the Dean of Graduate Students, Wellesley College, stating the applicant's reasons for desiring to do graduate work in the department chosen, and her reason for applying for the scholarship. The award will be made after the candidate's formal application for admission to graduate work has been accepted.

Laboratory assistants and other members of the official staff of the College are granted the privileges of graduate study without tuition charge.

GRADUATE STUDY IN CLASSICS:—

The American School of Classical Studies in Athens offers special opportunity for graduate study in Greek. Membership without tuition,* is open to all graduates and graduate students of Wellesley College who have done sufficient work in Greek and Archæology to profit by the opportunity. The object of the School is to furnish an opportunity to study in Greece the literature, art, antiquities, and history of the country under suitable guidance; to prosecute and to aid original research in these subjects; and to assist in the exploration and excavation of classic sites. Three fellowships of \$1,000 each are awarded annually on the basis of competitive examinations and are open to graduates of the co-operating colleges of which Wellesley College is one. For further information apply to Assistant Professor McCarthy.

The American School of Classical Studies in Rome is an integral part of The American Academy. The object of this School is to promote the study of classical literature in its bearing upon antiquities and history; of classical, Etruscan, and Italian art and archæology, including topography, palæography, and epigraphy, and of the art and archæology of the early Christian, Mediæval, and Renaissance periods within the boundaries of Italy. It furnishes regular instruction and guidance in some or all of these subjects, encourages and assists in original research and exploration. Students should have the ability to read ordinary Greek and Latin prose at sight and to use French and German as instruments of research; they will find an elementary knowledge of Italian very useful. Those admitted are expected to put themselves under the guidance of the Director of the Academy and the Professor in charge of the Classical School for the full period of eight months. Duly qualified graduates of Wellesley Col-

lege are exempt from any charge for tuition. Three Fellowships in the School of Classical Studies are offered by the Academy, each with a stipend of \$1,500 a year for two years, and an allowance of \$500 for transportation to and from Rome. The academic year begins on the first day of October and students are expected to report in Rome at the Academy on that day. A Summer School established in 1923 offers a programme of great value for students and teachers of the classics. For further information application may be made to Associate Professor A. Bertha Miller.

SCHOLARSHIPS IN THE MARINE BIOLOGICAL LABORATORY AT WOODS HOLE.—Admission to courses at Woods Hole is upon a selective basis. Wellesley College offers annually two scholarships to applicants who are successful candidates. This laboratory is primarily for research, but in the summer courses of instruction are offered, four in Zoölogy and one in Botany. The purpose of these courses is to aid in the production and training of investigators, and first consideration is given to persons who, whether graduate or undergraduate, give promise of contributing to the advancement of science. Applicants must have completed at least two full college courses in the subject in which they wish to work. The laboratory offers, besides these courses of instruction, opportunity for research, either under direction or independent. In addition, there are courses of lectures on special topics and on subjects of general biological interest.

Applicants should state the character of the work to be done, whether botanical or zoölogical, whether courses of instruction are desired, or investigation under direction. All applications should be sent to Professor Snow or Professor Moody in time to reach Wellesley College before April first. These applications will be forwarded to Woods Hole to be acted upon May fifteenth; after this date notification will be sent to the successful candidates.

B. FOR UNDERGRADUATES

The scholarships listed are awarded in recognition of genuine pecuniary need and of satisfactory character, college citizenship, health, and intellectual and practical ability as tested by a year or more of life and study at Wellesley College. The foundations are of varying amounts, and the income is apportioned as justly as possible according to need and merit. These scholarships are intended primarily for students who have completed one or more years' work at Wellesley College. Provision for new students and additional provision for other students have been made as indicated below.

Beginning with the academic year 1926-27 the Trustees have set aside annually a sum for the aid of students of recognized intellectual ability who are financially unable to meet the charges for tuition and residence. The scholarships vary from \$100 to \$300 with occasional exceptions, and are awarded on the basis of merit with due consideration to need, scholarship attainment, and personal qualities. *Applications from new students* for scholarships should be made to the Secretary of the Board of Admission before March first of the year of admission.

Competitive Scholarships for Freshmen. Six competitive scholarships for one year's tuition, \$400, are awarded annually on the basis of entrance examinations to members of the freshman class needing financial assistance. One of

these scholarships will be given to the freshman who has made the highest average grade in her entrance examinations. The other five scholarships will be assigned by districts in the following divisions of states: New England, Middle Atlantic, Southern, Middle Western, and Far Western. In each district the freshman making the highest examination grade will ordinarily receive the award, but if no student attains a sufficiently high average, the award will not be made. Applications for these competitive scholarships should be made to the Secretary of the Board of Admission before March first of the year of admission.

Applications from students in College must be filed with the Executive Secretary of the College, who is Chairman of the Faculty Committee on Scholarships, before March first on forms furnished for the purpose and in accordance with instructions posted in February of each year.

Munger Hall, a coöperative house, accommodating 111, is open to self-helping students of the three upper classes. For the year 1933-34 Norumbega Hall, accommodating 50 students, will also be used as a coöperative house. Twenty places in this house are reserved for freshmen.

The Personnel Bureau is actively engaged in bringing students into connection with work to be done for compensation within the College and in the neighborhood, but such employment, since it makes a distinct draft upon strength and time, is hardly to be advised for the freshman year.

Another source of pecuniary aid is the work of the Students' Aid Society established by the founders of Wellesley College and revived and incorporated by the alumnæ of the College in April, 1916. Distributions are made both in gifts and in loans without interest. The existing funds are not sufficient for the work in behalf of students which the Society aims to do, and contributions of any amount will be gladly received by the treasurer of the Society, Miss Ruby Willis, care of Wellesley College.

PERSONNEL BUREAU

The staff of the Personnel Bureau consists of a Director, a Consultant, an Associate, an Appointment Secretary, and two assistants.

The Personnel Bureau is a central depository of the individual histories of the students as collected from the records of grades, from interviews, personality ratings by the faculty, psychological tests, health reports, and extra-curricular activities, and is maintained for furnishing material of value in educational and vocational advising. The Bureau is in active coöperation with other administrative offices by means of the Personnel Board. This is composed of the President of the College, the Deans, the Recorder, the Health Officer, the Resident Physician, the Professor of Psychology, and the Director of the Personnel Bureau. Meetings are held from time to time for the consideration of personnel questions and methods of procedure.

The Personnel Bureau, established by the Founders as the Teachers' Registry, includes also in its scope the placement of graduates in teaching and in business positions, and the work of the Committee on Vocational Information, which arranges lectures and discussions on occupations. Registration for placement is open to all who have taken courses in Wellesley College, and seniors are invited to register during their residence at the College. The Bureau maintains files, collects credentials, and is the source of information concerning the vocational equipment and experience of Wellesley women. The registration fee is \$2.00 for life membership, and no commission is charged for placement. The Bureau also registers undergraduates and alumnae for summer work, and has charge of undergraduate employment.

EQUIPMENT

HETTY H. R. GREEN HALL, the Administration Building, contains the offices of the President and other officers of administration, class and seminar rooms, the faculty assembly hall and offices of student organizations.

FOUNDERS HALL, a building for lecture rooms and department offices pertaining to instruction in the Liberal Arts, was opened for use in September, 1919. The hall was built from the Restoration Fund, secured for the College through trustees, faculty, alumnae, and other friends, and replaces in some part College Hall, the first and main building of the College, destroyed by fire, March 17, 1914. The building is dedicated as a memorial to the Founders of the College, Henry Fowle Durant and his wife, Pauline Adeline Durant.

THE LIBRARY of the College, endowed by Eben Norton Horsford, now numbers over 150,000 bound volumes, including the departmental libraries. The books in the General Library building form a collection chosen primarily for the use of students and instructors in the college courses in Literature and Languages, History, Economics, Sociology, Philosophy, Education, Religious History and certain of the sciences. The General Library is open on week days from 8:10 A.M. to 9:30 P.M., and on Sundays from 2:30 to 5:30 P.M. Students have direct access to the shelves. The Library is catalogued by author and subject entries, and the most recent and useful bibliographical aids are provided. Special effort is made to train students in methods of research.

The Library subscribes for more than six hundred American and foreign periodicals, including daily newspapers representing different sections of the United States, besides representative British and Continental dailies.

The Library has also many special collections of great interest and value to the student doing graduate or other research work. Among the most valuable of these are the Plimpton Collection, established by Mr. George A. Plimpton in memory of his wife, Frances Pearsons Plimpton, of the class of 1884, which comprises over a thousand volumes of Italian books and manuscripts chiefly of the Renaissance; the Ruskin Collection, the gift of Mr. Charles E. Goodspeed; and the Collection of Early and Rare Editions of English Poetry given for the most part by Professor George Herbert Palmer.

The Brooks Memorial Room, opened in 1921, provides comfortable and beautiful surroundings with carefully selected books for leisure hours of reading.

The following departmental libraries are located in the buildings of the respective departments: Art, Astronomy, Botany, Chemistry, Hygiene, Music and Zoölogy.

FARNSWORTH ART MUSEUM.—The Farnsworth Art building was the gift of the late Isaac D. Farnsworth in 1889. It contains lecture rooms and exhibition galleries and is used by the Department of Art for its library, study rooms and studios.

Through the active interest of friends of the College, the Museum contains a representative selection of Egyptian minor arts, three examples of Greco-Buddhist stucco sculpture from Chinese Turkestan, the M. Day Kimball collection of antique sculpture; examples of early Italian painting; a valuable early 16th century tapestry; a unique collection of primitive Indian baskets; the beginnings of a collection of English and Colonial embroidery and ceramics; a few modern paintings, including an important early Corot, an attributed Morland, and the Cumæan Sibyl by Elihu Vedder.

Further information may be found in the Art Museum Bulletin.

MUSIC HALL AND BILLINGS HALL are large brick buildings, devoted to the department of Music. Music Hall contains offices, studios, and practice rooms equipped with thirty-seven new pianos of standard makes, a victrola and a Mason and Hamlin Ampico; also a large room, containing a two-manual pipe organ for the use of the organ pupils. Billings Hall, opened in 1904, contains the offices of the Professor of Music and the Assistant, the library and a class room for instruction in Musical Theory; also a concert room with a seating capacity of 330 people, containing a grand piano, a victrola, and the Grover organ,—a three-manual organ, rebuilt and modernized by the Estey Organ Company.

The Music Library includes a collection of manuscripts, about twenty-one hundred scores and two thousand reference books on musical subjects. The department owns about three hundred records for the victrola and fifty ampico rolls.

ALUMNAE HALL, the gift of the alumnae for a recreation centre, contains an auditorium seating 1570, a hall for college dances, a library, committee rooms for the use of alumnae and students, and full equipment for entertaining.

LABORATORIES AND SCIENTIFIC COLLECTIONS

ASTRONOMY.—The Whitin Observatory is a one-story building of brick, faced with white marble, situated on a small hill on the college grounds, and devoted entirely to the use of the department of Astronomy. It contains two rooms surmounted by rotating domes, twenty-five feet and twelve and one-half feet in diameter respectively; a transit room; a spectroscopic laboratory; a large, well-lighted room for elementary laboratory work; and another large room in which is kept the department library. In the larger dome room is mounted a twelve-inch Clark equatorial refracting telescope, which is provided with a filar micrometer, a polarizing photometer, and an attachment for photographing the moon. The smaller dome contains a six-inch Clark refractor, which is provided with an electric driving clock, a filar micrometer, a wedge photometer, and an Evershed protuberance spectroscope, and which may be used as a guiding telescope for a small photographic camera. Both domes are rotated by electric motors. In the transit room is mounted a Bamberg prismatic transit of three inches aperture. A four-inch telescope with objective by Browning is mounted in a south wall of the building, with the eye end inside and the optic axis parallel to the axis of the Earth; a plane mirror beneath the object-glass reflects into the latter the light of the object observed. In the spectroscopic laboratory are a Hale spectrohelioscope and a small Rowland concave grating spectroscope. The Observatory is supplied with two Howard sidereal clocks, a Bond mean-time chronometer, and a chronograph, any of which may be connected electrically through a switch-board with keys near the various telescopes; a Berger surveyor's transit; a 60-mm. Zeiss tripod telescope; two calculating machines; a Gaertner comparator for measuring spectrograms; a projecting lantern and about 1200 astronomical lantern slides; and a large collection of illustrative apparatus and photographs. A flat portion of the roof of the neighboring Sage Hall is fitted with illuminated desks for the use of astronomy students during naked-eye study of the sky.

Observatory House, the residence of the Director of the Observatory, is near by. Both the Observatory and the house, and also the greater part of the astronomical equipment, are the gift of the late Mrs. John C. Whitin.

BOTANY.—The department of Botany occupies a modern building (Sage Hall) with laboratories, research rooms, offices, etc., fully equipped for general and special work. Connecting with the building at three points is a range of modern greenhouses consisting of a large palm house and fourteen smaller houses.

The illustrative collections comprise an herbarium of some eighty thousand sheets, a working museum of more than five thousand specimens, and a large collection of lantern slides and microscopic mounts. The department has an "Outdoor Laboratory" for the use of certain courses. The greenhouses contribute to all the courses in the department, but are of especial importance in connection with the work in landscape gardening, physiology, ecology, taxonomy, and genetics. The native flora about Wellesley is easily accessible, furnishing a convenient field for both the taxonomist and ecologist. The Susan M. Hallowell Memorial Library is exceptionally well supplied with reference works and with current periodicals.

CHEMISTRY.—The department of Chemistry occupies a separate but tem-

porary building which contains two lecture rooms and the chemical library in addition to separate, well-equipped laboratories for work in general chemistry, qualitative and quantitative analysis, organic chemistry, food and physiological chemistry, and physical chemistry.

The tables in the lecture rooms are equipped with hot and cold water, gas, compressed air, and both direct and alternating current. There is also available for use in lecture demonstration a comprehensive group of apparatus for special experiments. A Bausch and Lomb Balopticon for both lantern slide and opaque projection has recently been added as an important adjunct to the lecture equipment.

An electric still keeps the analytical laboratories on both floors supplied with distilled water. The work in qualitative analysis has been greatly facilitated by the installation of a tank of liquid hydrogen sulphide outside the building. From this tank the gas is piped to the hoods in both the qualitative and quantitative laboratories. The quantitative laboratory is the most recent addition to the building. It is fitted with metal desks with alberene tops. These desks were especially designed for the particular apparatus used in such work.

GEOLOGY AND GEOGRAPHY.—The department of Geology and Geography has a large and well-equipped lecture hall, a small lecture room, and two laboratories. Both lecture rooms are equipped with projecting lanterns.

The museum and laboratory material of the department includes a typical collection of dynamical and structural geology specimens, systematic mineralogical and petrographic collections, and a wide variety of fossils. These collections are all the generous gifts of colleges, museums, and friends. The department has two noteworthy collections. The first is the Horace I. Johnson Mineral Collection, which consists of five thousand valuable and beautiful mineral specimens, including many precious metals and stones. This collection is the gift of the late Mr. John Merton, and was presented through the Class of 1915 by the courtesy of Miss M. Helen Merton. The second is the Reverend David F. Pierce Collection, which includes a complete and rare collection of building and ornamental stones and many precious and semi-precious minerals. This collection is the gift of Professor Frederick E. Pierce of Yale, Miss Anna H. Pierce, and Miss Mary E. Pierce of the Class of 1898.

The maps of the department include many large scale wall maps, maps of the United States Coast and Geodetic Survey, and complete files of geologic folios and topographic maps of the United States Geologic Survey. In addition several thousand topographic maps and folios are arranged in collections for individual use in the laboratory. The department has an excellent assortment of lantern slides which illustrate many phases of geology and geography.

HYGIENE AND PHYSICAL EDUCATION.—The department of Hygiene and Physical Education occupies Mary Hemenway Hall on the western border of the college grounds. The equipment of the department is designed for the application of modern science to the maintenance and promotion of health and for education through motor activity.

Mary Hemenway Hall includes a large well-lighted gymnasium with ample bathing facilities, administrative offices, class rooms, and laboratories for anatomy, physiology, hygiene, anthropometry, corrective exercise and research.

Unusual facilities for outdoor activities are provided as follows: one four-

target archery range, six volley ball, four basket ball, and twenty-two tennis courts; one baseball diamond, two hockey and lacrosse fields, one 100-yard straight-away track and jumping pits; and a nine-hole golf course. Bridle paths are available for horseback riding. Close by, on Lake Waban, are two boat-houses, with canoes, eight-oared shells, and motor boat for coaching and safety patrol. The Lake provides opportunity for swimming in the spring and fall terms, and for skating in the winter. The campus is well adapted to skiing, snowshoeing, and coasting.

The department library in Mary Hemenway Hall contains 4,100 volumes, a collection of valuable pamphlets, and regularly receives 50 periodicals dealing with matters related to hygiene and physical education.

MATHEMATICS.—The department has a collection of 45 Brill-Schilling models of surfaces, chiefly of the second and third orders, and a lantern for use with large thread models in the study of skew curves, beside several simple models, including some made by its members. There is a fine transit for the use of classes in Trigonometry, and a computing machine, used in the classes in Statistics.

PHYSICS.—The department of Physics occupies as temporary quarters three floors in an old building. There are two lecture rooms, fitted with direct and alternating current, gas and compressed air, and separate laboratories for general physics, electricity and light. In connection with the advanced laboratories there are dark rooms and several small rooms which can be used for research or for individual experiments requiring special conditions. The equipment is thoroughly modern. The lecture apparatus is sufficient to permit a wide range of experiments. In the elementary laboratory, duplication of apparatus permits a close coordination between lectures and laboratory exercises. The equipment for advanced laboratory work is especially strong in electrical and optical apparatus. It includes an unusual equipment for experiments in electric oscillations; a Hilger quartz spectrograph and constant deviation spectrometer; a Weiss electromagnet, a Bragg X-ray spectrometer, etc.

There is connected with the laboratory a machine shop in charge of a mechanic who makes and repairs apparatus as needed.

PSYCHOLOGY.—The laboratory is housed in a building which is located in a quiet spot and which contains sixteen rooms with good electrical connections. Two dark rooms and a workshop are included. The equipment is adequate for demonstration, for general experimental work, and for many lines of research.

ZOOLOGY AND PHYSIOLOGY.—The department of Zoölogy and Physiology occupies a new building (Sage Hall) opened in the autumn of 1931, containing lecture rooms, laboratories, research rooms, a library—a memorial to Caroline B. Thompson,—a museum, and a vivarium, which includes mammal rooms and runways and a large aquarium room containing frog and turtle pools, tanks for salt and fresh water forms and for tropical fishes. The new building, fully equipped with modern apparatus, enables the department, for the first time since the fire of 1914, to conduct all its work under one roof; to emphasize, through the vivarium, the importance of the study of living forms; and to display museum material which has long been in storage. This illustrative material includes a collection of New England birds; an interesting collection of birds and bird-skins from Peru, the gift of Mrs. Graham Ker; and a valuable collection of shells, the gift of Mrs. Rebecca S. Beaman of Cambridge.

HONOR SCHOLARSHIPS

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of two and one-half years' work, to juniors on the basis of one and one-half years' work. The standard in each case is absolute, not competitive.
